EMATH 100

Seatwork 10-01-26
Deadline: 5:00 PM today

Directions: Show your step-by-step solutions.

1. Write and graph the equation of the circle in standard form with the given center of (-2, 3), the point (-1, 0).

2. Write the equation of the line tangent to the circle $(x-1)^2+(y+2)^2=26$ at the point on the circle (2, 3).

3. Determine the equation of the line and graph it if the line has a slope of -1 and passes through the point (3, 4).
